

HD

Standard concrete pontoons.

For marinas, berthing facilities and developments on water.

Concrete pontoons in a marina layout.

A modular concrete system tailored to each project through its layout, connections and equipment. For floating piers, berthing facilities and platforms on the sea, rivers or lakes.

LENGTH

10 / 12 / 12.5 m

WIDTH

2.4 / 3 / 4 m

HEIGHT

0.95 m

System dimensions.

Module lengths	10 m / 12 m / 12.5 m
Module widths	2.4 m / 3 m / 4 m
Module height	0.95 m

The dimensional combination and final specification are confirmed in the quotation for each project.

Concrete pontoon and perimeter timber fender detail.

The pontoon forms the base.

Dimensions, module layout and connections are selected for the intended use and site conditions. Pontoon mooring and access from shore are developed for each project.

Equipment and connections.

End-to-end and side-to-side connections, gangways, finger piers, mooring cleats, fenders, ladders and utility pedestals for power and water. Optional decking is selected to suit the project.

Pontoon manufacture, transport, installation and consultancy can be contracted to meet project needs. Complete design documentation is contracted and charged separately.

Let's discuss your project.
